

Group number: 1721

Project title: Glucose detection using a disposable nanosensor

Client &/Advisor: Prof. Que

Team Members/Role: Shir Linn Tan (Team Leader)

Wai Han Kong (Team Communication Leader)

Dalton Strauser (Team Key concept holder)

XiongSheng Yi (Team Webmaster)

(All the above information should be there in each weekly report. The format/color scheme etc need not be the same.)

○ **Weekly Summary (Short summary about what you did this week)**

For this week, it was third testing for our glucose detection project. The concentration of glucose solution we used was 10mg/ml at this time. Same as before, we used three detectors to test three groups of data. Each detector had three sets of data. All the data detected were stored in the excel and we plot the glucose concentration functions in the excel.

Past week accomplishments (please describe as what was done, by whom, when)

Testing and analyzing the glucose solution by the concentration of 5.3mg/ml in the lab.

○ **Pending issues (if applicable)**

- Shi Linn Tan: Use the glucose detectors to test the glucose solution by concentration of 10mg/ml, analyze data and plot the corresponding figure.
- Wai Han Kong: Use the glucose detectors to test the glucose solution by concentration of 10mg/ml, analyze data and plot the corresponding figure.

- Dalton Strauser: Use the glucose detectors to test the glucose solution by concentration of 10mg/ml, analyze data and plot the corresponding figure.
- XiongSheng Yi: Use the glucose detectors to test the glucose solution by concentration of 10mg/ml, analyze data and plot the corresponding figure.

○ **Individual contributions**

<u>NAME</u>	<u>Individual Contributions</u>	<u>Hours this week</u>	<u>HOURS cumulative</u>
Tan Shir Linn	Go to lab, do the testing of 10mg/ml glucose solution, analyze data and plot the corresponding figure.	2	13
Wai Han Kong	Go to lab, do the testing of 10mg/ml glucose solution, analyze data and plot the corresponding figure.	2	13
Dalton Strauser	Go to lab, do the testing of 10mg/ml glucose solution, analyze data and plot the corresponding figure.	2	13
XiongSheng Yi	Go to lab, do the testing of 10mg/ml glucose solution, analyze data and plot the corresponding figure.	2	13

○ **Comments and extended discussion**

The third testing was going pretty well, we obtained the all the figures as we expected.

○ **Plan for coming week (please describe as what, who, when)**

- Shir Linn Tan: Glucose solutions testing for concentration of 20mg/ml.
- Wai Han Kong: Glucose solutions testing for concentration of 20mg/ml.
- Dalton Strauser: Glucose solutions testing for concentration of 20mg/ml.
- XiongSheng Yi: Glucose solutions testing for concentration of 20mg/ml.

○ **Summary of weekly advisor meeting (if applicable/optional)**

No advisor meeting but doing testing in the lab with his PhD student.
